

Executive swivel chair, Conference swivel chair of course

A masterpiece is unmistakable. It captivates at first glance.

Luxury is the freedom to surround yourself with the things you like. Don't compromise.

Sedus "of course" comes into its own wherever strategies are developed, corporate destinies determined and issues for the future decided. Be it at the desk or conference table, focusing on the job or engaged in lively debate. Cutting-edge ergonomics optimally support the body and free the mind for the job at hand. Inspired by the new office culture of productive well-being: Sedus Place 2.5

Leadership is a question of style. It's time to take command.

It is not easy to excel. Yet, when achieved, excellence is a source of pleasure.

High-flyers deserve outstanding ergonomics and comfort. Sedus has been guided by this belief for over 140 years. This philosophy has provided a breeding ground for important innovations time and time again. And yet, the creation of a new office swivel chair to meet the most stringent of demands still presented a unique challenge. A contemporary masterpiece which gave the Sedus product developers and designers free reign to turn their perceptions of quality and comfort, functionality and design into reality.

Perfection inspires productivity. And pleasure.

Unmistakable.

The distinctive panels on the backrest and armrests are eyecatching. Their design can be customised in different colours, with high-quality varnishes and woods and – as an exclusive highlight – with a refined Corian® finish.

Simple height adjustment up to the individual seat height. The backrest pressure can be increased/decreased in an instant for users from 50 to 150 kilos using the patented quick adjustment mechanism. Pre-selectable opening angle of 0, 11, 22 or 32 degrees.

Seat height adjustment.

The patented Sedo-Lift technology with mechanical locking is non-wearing and is able to completely cushion your body weight, even in the lowest sitting position.

Multilayer upholstery.

Three upholstered layers made of different materials with a volume of up to 70 mm ensure optimal pressure distribution and support and thus guarantee maximum sitting comfort.

Optimal opening angle.

The opening angle of the backrest can be set to suit individual requirements; operation is intuitive and self-explanatory, as with all functions.

An overview of the Sedus "of course" range:

Conference swivel chair, 4-leg model with felt or plastic glides.

Executive swivel chair with medium backrest and castors for soft or hard floors.

Executive swivel chair with high backrest and integrated headrest with "independent fit" technology.

Aktion Gesunder Rücken (campaign group for healthier backs) www.agr-ev.de

Companies, people and the environment all benefit.

Sedus is committed to transforming working in an office into a profitable experience for all, for the benefit of both companies and their employees. This mission statement is laid down in the corporate policy and encompasses all of the aspects which are so vitally important for office work.

Place 2.5 stands for the new office culture of productive well-being. The concept is based on perfect ergonomics, functionality and working conditions. Design, light, acoustics, atmosphere and air are just some of the other elements. The result is office environments designed to enhance well-being, in which people like to work and are therefore more productive.

Sedus' thinking is holistic and customer-oriented: companies today require not just office furniture but needs-orientated solutions for efficient working processes. What they want is future-proof office working environments that are consistent with the corporate culture. Sedus delivers just that with its comprehensive, flexible product range and with its individual consulting and planning services. Quality and sustainability have been the cornerstone of Sedus' success for more than 50 years now. In addition to working in a way that conserves resources, designing products which are recyclable, using ecologically tested materials and being energy-aware in its manufacturing, Sedus pursues one thing above all else: product quality that lasts, because that's what is best for the environment. The latest example: innovative laser edging. All products which carry the emblem "lasered by Sedus" guarantee seamless edge processing of the highest quality. In terms of aesthetics and material technology, the advantages are impressive: flawless beauty, robust durability and a bonus for the environment.
