

relations

sedus

Innovative ideas are stimulated by an inspiring environment. **relations.**

Efficient knowledge work depends on outstanding team players. Creative synergy – “relations”, the innovative furnishing concept from Andreas Struppler’s design team, generates movement. Storage units, desks, mobile pedestals and intelligent accessories combine to form a functional environment. The result: office designs that inspire. Flexible and communicative as life itself: the optimal working environment – **Place 2.5**

Modern, elegant, full of character in every detail – a stylish table with angular legs. Height adjustment from 620 mm to 850 mm allows for great versatility. A choice of polished or powder-coated frames in white, white aluminium or anthracite. The sturdy, parkable folding table creates space. All models, including the folding table, are available with castors.

In the office as on the sports field, commitment is a key quality of successful people. But motivation can only be generated if each person has scope to express his or her own personality. With height-adjustable desks, colourful modesty panels, storage space in trolleys, and brackets for PCs or printers, "relations" creates individual spaces with the power to inspire. And an individual desk becomes the perfect workstation.

Cable management.

The practical cable dump is ingeniously concealed beneath the optional sliding top: for easy access, it opens and also tilts from both sides. Perfectly designed for

routing all your electric-cables. The cables themselves run neatly out of the cable dump, through the cable vertebrae and to the floor box. So everything stays neat and tidy.

Height adjustment.

620 mm today. 850 mm tomorrow. 760 mm the day after. This desk is ideal for everyone – no matter how short or tall.

Further information and planning data are available to download at: www.sedus.com

Handwheel. Perfect ergonomics at the workplace – the lock-in adjustment provides flexible height adjustment. Without any tools whatsoever.

Power point. The workstation itself has a personal power tray with retaining bracket. Always within easy reach. Perfect for charging electrical equipment, like mobile phones.

Modesty panel. Colourful plexiglass panels provide an ideal screen below the table top as well as above. Also available in metal.

Printer. Or PC – right at the workstation. Always ready at hand, the paper compartment also offers ample storage. A highly functional solution.

3rd level. Innovative; practical; quality down to the last detail. The third level is a versatile organisation rail with clean aesthetics. Storage tray, CD rack, flower vase or cup holder: the function bridge serves every purpose simultaneously. Flexibility anywhere and everywhere. Creating free space.

Desk screen. When your work demands total concentration, colourful plexiglass gives you the peace and quiet you need.

Desk screen. Green or translucent white. The attractive desk screen protects your private space in the office. In combination with storage boxes, this practical module creates more desk space.

Storage trays. Whether A4 size or smaller, these trays help keep important information tidily sorted and easy to find.

Grasshopper. Table-top grass. Miniature desk screen. The plastic photo/note holder adds to the atmosphere in the office. Inspiration. New ideas.

Flower vase. A piece of nature on your desk. And your mood is instantly transformed. Whatever the season.

CD rack. Makes space for creativity. And keeps your desk tidy – for up to 10 CDs/DVDs.

The team. Team spirit and good relationships have always played a major role in the office environment, as they do in sport. “relations” creates optimal conditions for inspiring teamwork and the best possible prospects of success. The innovative furnishing concept doesn’t just enhance communication in the office, it also gives creativity a real boost.

Tactics. Defence or attack? Business needs a game plan. Work needs assignment of specific tasks. “relations” adapts accordingly. Single workstations and team tables are quick and easy to combine with mobile pedestals and innovative accessories. Conference tables fold out and fold away again. Screen systems create mobile rest areas. Communication, movement, quick changeover.

Substitutes. None are needed here. Yellow card, red card, sending-off? All superfluous. "relations" sends the entire team onto the pitch: giving countless possibilities for individual office design. Green grass elements, the third level and colourful desk screens bring a personal touch to the office environment. Completing the language of form perfectly.

Defence. In the changing room and on the pitch – two different kinds of communication. Undisturbed working requires a place to retreat, behind threads, fabric or felt – as with “relations”. Mobile screen systems permit confidential discussions even in the largest open-plan office. Whiteboard and flipchart, on the other hand, lend structure to large meetings and conferences.

“Keep it simple” is the motto of the steel trolley. Reduced to the essential, this handy “runabout” in white or white aluminium provides storage space for the most important things you need at work. Ideal for tidily storing anything from pens and pencils through to documents or refreshments.

Catering. Crockery, cutlery, bottles and glasses.

Presentations. Accessories, multiple socket outlet.

Organisation. Storage space for files etc.

The key quality that today's office furniture must have is flexibility. Mobile pedestals give you storage space on wheels. Refreshing drinks, crockery, important documents and presentation accessories are always ready at hand – in the catering, organisation and presentation pedestal. Any time, any place.

The designers of the different storage units in “relations” experimented with a variety of materials. The fronts in real wood veneer, melamine, paint or glass are freely combinable. Whether storage unit (4-5 binder height) or credenza (2-3 binder height), the doors of these units run on two rails. The special sliding-door mechanism creates space for hanging folder systems and drawers – over the full width of the unit. Files, documents, work materials – all easily accessible. Left, right and centre. At all times.

5 binder height. Red/White – one of the striking colour combinations.

5 binder height. Practical sliding doors – storage unit with multiple shelves.

5 binder height. Storage unit at the front – media panel at the rear.

5 binder height. Left back. Attacking midfield. Forward. Goalkeeper – the integral whiteboard.

Aluminium frame. Eye-catching design feature – the front of the unit has an aluminium surround.

Handle options. The angular handle is a convenient alternative to the recessed pull.

A winning team owes its success to the seamless cooperation of all its members. But sometimes office team players want a little time by themselves – behind threads, fabric, grey felt or a white projection screen. Concentration. Exchanging ideas. One-to-one discussions.

Customer meeting

Dialogue

Seminar

Conferences. Seminars. Team meetings. Lifetime learning is as vital to today's working world as grass is to a football pitch. Stackable chairs gather round the mobile flipchart complete with pen tray. A projection screen completes the scene. And already this furniture group becomes a mobile seminar room. Quick to set up and take down – nothing could be easier. Creative working made simple. Ideas flow. Concepts follow.

Brainstorming

Concentration

Communication generates creativity. Exchanging ideas is a source of inspiration. Shared success brings out the best in each team member. So it's good to have furniture that plays its part too. Like the square team table. Power and network cables are out of sight in the integrated cable box. Enough discussion? The third level turns a conference table into a double workstation quickly and simply.
