## Juno

**With Juno, plastic chair has come of age. Cast in a single form, it has fluid lines and a light profile, in silhouette and weight. It enjoys all the benefits of simplicity and uniformity but with a clever twist.**

**With its singular, simple shape, Juno brings efficiency and customization together in unique combination. Made for both residential and contract use, indoors and out, Juno is a single-shot molded plastic chair available in four forms: solid back and open back, both with and without armrests. All forms are available in six colors: white, black, sand, anthracite, orange, yellow. Seat and back rests can also be customized with sleek upholstered pads. All variations are stackable to allow for large-scale use and storage.**

### Designer

James Irvine, 2012

Born in London, James Irvine graduated from the Royal College of Art London in 1984. That same year he moved to Milan, Italy to begin his practice as a design consultant for Olivetti. In 1987, he worked at the Toshiba Design Centre in Tokyo. At this time, he began his own design practice in Milan. From 1993 to 1999, he was a partner of Sottsass Associati Milan responsible for industrial design. Distinguished visually by a geometric formalism, Irvine describes his practice as ultimately guided by a concern for the end user, an independent spirit and attention to the quality of life.

### Awards

- Design Guild Mark 2013, UK
- IF Product Design Award 2013, Germany
